# REDEFINING HAND REHABILITATION

The **Nuada Glove** represents a **breakthrough** in **upper extremity hand recovery technology**. This innovative powered glove system restores hand function through advanced biomechanical support, enabling patients to **regain independence in daily activities**. This mechanical tendon smart glove assists with hand flexion for those with hand weakness.

As the exclusive North American distributor, **Neuro Rehab Recovery** brings you this cutting-edge technology, combining sophisticated engineering with practical, patient-centered design.

## How it works:

### Biomechanical Support System

The Nuada Glove uses artificial mechanical finger tendons and a proprietary support system to assist finger flexion and maintain grasp:

### Keys Benefits

- ✓ Supports grasping and holding functions
- ✓ Two intuitive control modes
- ✓ Individual finger customization
- ✓ Suitable for clinical and home use
- ✓ An investment in independence
- ✓ Wearable technology for daily tasks
- ✓ Can hold a sustained grip of over 60 pounds

1

#### Engage

Patient positions fingers around object

2

#### Lock

System activates to maintain grasp

3

#### Function

Stable hold enables task completion

4

#### Release

Simple deactivation returns control. Adjustable Soft or hard grip for different daily activities

## ADVANCED TECHNOLOGY, SIMPLIFIED USE

### CONTROL MODE

#### Manual Mode - Touch Activated

- Simple tap on smartwatch screen
- Immediate lock/unlock control
- Perfect for controlled therapy sessions
- Ideal for initial training

#### Automatic Mode - Gesture Controlled

- Wrist movement activation
- Intuitive, natural control
- Customizable thresholds
- Promotes independence

### Customizable Performance

- Individual finger control sliders
- Emergency release lever for safety
- Adjustable grip strength
- Minimal training required
- Water-resistant components

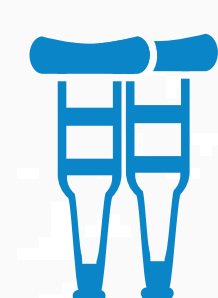

### Unique Safety Features

- Emergency release system
- Automatic timeout function
- Visual status indicators
- Ergonomic design prevents injury

## Technical Specifications:

- **Support Capacity:** 40kg (88 lbs)
- **Battery:** 3.7V, 1500mAh rechargeable
- **Weight:** 500g total system
- **Control:** Smartwatch interface
- **Assembly:** Tool-free setup
- **Materials:** Medical-grade components

# PROVEN CLINICAL EXCELLENCE

## Neurological, Orthopedic and Rheumatology Conditions

- Post-stroke hand rehabilitation
- Spinal cord injury (C5-C8)
- Traumatic brain injury
- Multiple sclerosis
- Peripheral nerve injuries
- Arthritis
- Post surgical weakness

## Activities of Daily Living

- Eating and drinking independently
- Personal hygiene tasks
- Dressing and grooming
- Writing and typing
- Household activities

## Patient Results

- Increased grip strength by up to 60%
- Enhanced motor control and coordination
- Improved confidence in daily tasks
- Reduced caregiver dependence
- Higher quality of life scores

## Therapy Applications

- Task-specific training
- Repetitive practice protocols
- Bimanual coordination exercises
- Progressive strength building
- Neuroplasticity promotion

## Ideal Candidates

- Partial hand function present
- Cognitive ability to follow instructions
- Motivated for independence
- Stable medical condition
- No contractures or high tone that limits finger range of motion

# COMPREHENSIVE SUPPORT PROGRAM

## Clinician Education

- ➔ One hour initial training session
- ➔ Hands-on practice with device
- ➔ Clinical application strategies
- ➔ Troubleshooting guide
- ➔ Continuing education credits available

## Complete Protection

- ✓ 2-year manufacturer warranty
- ✓ Textile and cable replacement
- ✓ Loaner units available
- ✓ Extended warranty options
- ✓ Satisfaction guarantee

## User Support Materials

- ✓ Illustrated user manual
- ✓ Video tutorials library
- ✓ Quick reference guide
- ✓ Home exercise programs
- ✓ Progress tracking tools

## Ongoing Assistance

- Phone and email support
- Remote troubleshooting
- Replacement parts available
- Software updates included
- Clinical consultation available

- **Week 1:** Device delivery and setup
- **Week 2:** Clinician training completed
- **Week 3:** First patient sessions
- **Week 4:** Progress evaluation
- **Ongoing:** Support and optimization

# Discover How the Nuada Glove Can Transform Your Practice

## *Empowering Lives Through Advanced Neuro Rehabilitation*

- ➔ Schedule a Demo
- ➔ Request Clinical Evidence
- ➔ Download Training Materials
- ➔ Speak with Current Users
- ➔ Try before you buy home rental trials
