

# Designed by Professionals, Made for Everybody

Warm-up

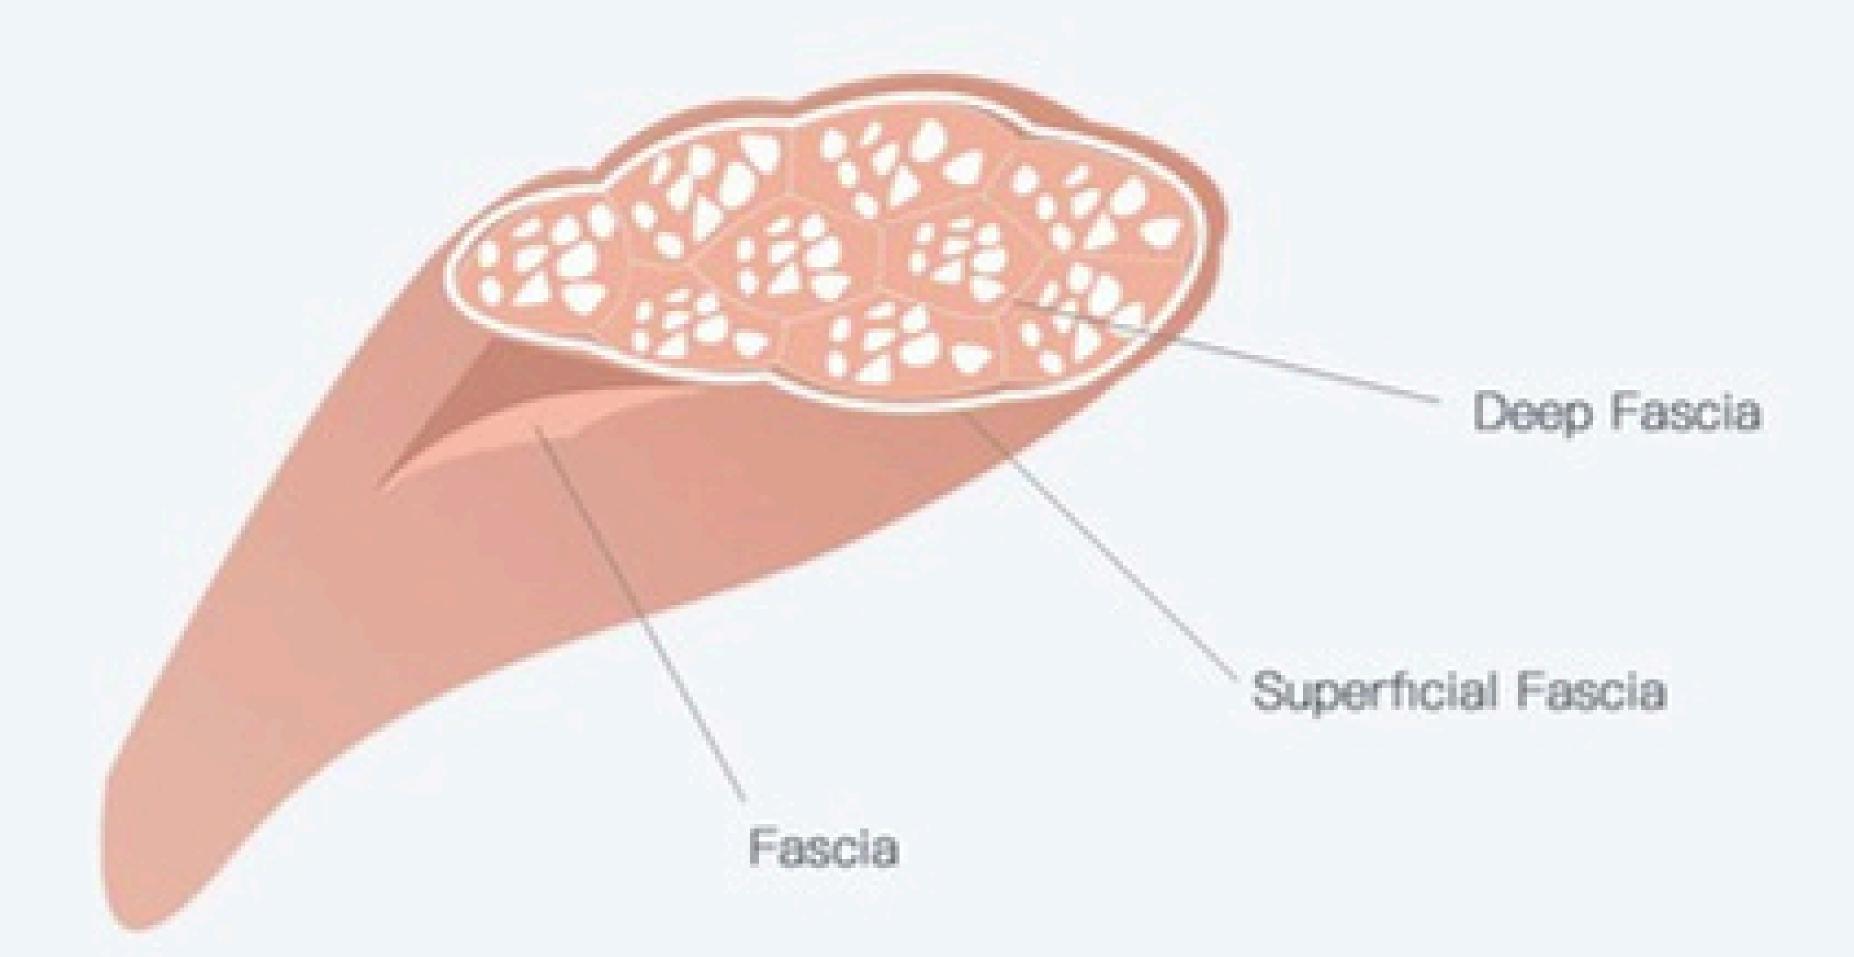

Wake up your muscle vitality. Relax your fascia and stiff muscles.

Defeat lactic acid quickly. Relieve the DOMS.

#### What is the fascia that makes your muscles painful?

The fascia is an important connective tissue that wraps muscles. It is divided into deep fascia and superficial fascia. Sedentary posture or strenuous exercise will result in rupture damage of muscles and fascia, and muscle stiffness. Such soreness hinders the recovery and growth of muscle elasticity severely.
